

## Assignment-3 (Group 1)

### User Stories for National Comedy Center

#### Project Introduction

The National Comedy Center, located in Jamestown, New York, is a museum dedicated to comedy. A lot of operations are involved at NCC, such as patron registration, patron's profile management, selection of comedians by patrons, exhibits showing audio or video as per selections made by patrons, managing patron's artifacts, fundraising, etc., to provide an immersive user experience. To outline these operations, user stories are required. The team working on the project includes a project manager, a front-end lead, and a back-end lead. Members and their roles are as follows:

1. Akanksha Kothari: Project Manager
2. Priyal Panda: Front-end Lead
3. Suraj Hipparge: Back-end Lead

Below are images of user stories and the distribution of tasks among team members:

The screenshot displays the Azure DevOps interface for the 'National Comedy Center' project. The left sidebar shows the navigation menu with 'Backlogs' selected. The main area shows the 'National Comedy Center Team' backlog. A message at the top states: 'Thank you for trying the new boards hub preview. If you experience any issues, please [report the bug](#). If your issue is blocking, you can disable the preview by following [these steps](#).'

The backlog table lists the following work items:

Order	Work Item Type	Title	State	Effort	Business Area	Value Area	Tags
